EXPERIENCE

Senior Full Stack Developer June 2024 – Present
Navan *Bangalore, India*

- Rebuilt Travelfusion post-booking seat synchronization for LCC flights while maintaining backward compatibility.
- Reduced **$10K+/month** revenue leakage by implementing flight exchange and booking audit logs to detect ghost bookings.
- Built and own provider logging system using Amazon S3 which saves hours of debugging and better visibility while handling 100-200 transactions per second.
- Fixing Verteil-related issues around FQTV handling, preventing incorrect pricing and saving customers from overpaying on bookings.
- Decomposed booking remarks from the monolith into a standalone microservice; migrated **1M+ bookings** and **1.7M+ notes**.
- Designed data migration and service boundaries to enable zero-downtime rollout across production traffic.
- Set up service-level metrics and New Relic dashboards, improving on-call monitoring and incident triage.

Software Engineer June 2022 – June 2024
Jupiter Money *Bangalore, India*

- Built a product-agnostic credit card onboarding service; designed database schemas and bank integrations supporting **50K+ onboardings**.
- Led development of customer success dashboards, reducing response time from **44 minutes to 1 minute**.
- Optimized onboarding APIs and database queries to handle peak traffic during high-volume campaigns.
- Collaborated with product, operations, and banking partners to safely roll out onboarding changes in production.

Software Engineer June 2021 – June 2022
Zomentum *Bangalore, India*

- Shipped Stripe payment integrations, scaling to **$50K** in transactions with 100+ active integrated users.
- Added configurable adjustment fees to the payments platform to support multiple billing workflows.
- Improved payment reliability by handling retries, failure states, and webhook-based reconciliation.

Student Developer May 2019 – Aug 2019
Google Summer Of Code (Codeuino) *Remote*

- Delivered frontend and backend modules for the Donut platform under GSoC; documented and tested features. Project Link

PROJECTS

Notion Diary Built a full stack Notion-to-blog platform with real-time sync and SEO support; achieved **#4 Product of the Day on Product Hunt** with **100+ users**.

NFTngine End-to-end platform to mint AI-generated images as NFTs, covering generation workflows, metadata, and minting pipelines.

SKILLS

Languages	Java, JavaScript, Golang, Python
Backend	Node.js, Microservices, REST APIs, System Design
Databases	PostgreSQL, MongoDB
Infra & Observability	AWS, New Relic
Frontend	React.js

EDUCATION

Btech in Computer Science Engineering, Jaypee Institute Of Information Technology 2017–2021
